E D U C A T I O N

New Jersey Institute of Technology
Major: Computer Science
January 2014- December 2014.

Bergen Community College
Associates in Computer Science
Graduated: May 2013

- Provide production support Helpdesk ticket assistance with analysis and research of production problems, user questions and system usage inquiries.
- Recognized and improved code inefficiencies which increased software stability.
- Engaged in application architecture and design decisions
- Managed all phases of application design of web landing pages for clients – from coding and prototyping through system testing, integration and deployment.
- Implemented Google Analytics and Google Tag Manager to our web application for usage metrics.

Financial Services BOC Specialist

Samsung Electronics America – Ridgefield Park, NJ, USA - 2015-2018

One of the world's largest producers of electronic devices.

- Assisted with automation to create .csv files with customer's data for return authorizations by writing VBA code and using macros and formulas to speed processes and maximize accuracy.
- Executed full investigation of discrepancy items; worked with the respective re-seller on product reconciliation.
- Oversaw A-goods stock rotation; generated reports from imported data from SAP and presented a list of authorized returns based on last quarter sales.
- Aided in updating and inserting data in SAP.
- Part of the Top Load Washer Project where Samsung had to recall over 2 million washing machines due to manufacture defects; processed over three thousand return authorization requests from customers all over the country and automated the creation of discrepancy reports on all washer machine returns.
